

Appalachian BASIN

HORIZONTAL WELL DATABASE

Database Background

JKPC has developed an extensive database for the Appalachian Basin based on state reported data since 2003. Our database consists of unconventional wells ranging in status from permitted to producing. Formations include: Marcellus, Utica, Burkett, Upper Devonian, Lower Huron, and other unconventional formations.

Our dedicated team is devoted to providing you with the best and most current horizontal well data available. We use our database on a daily basis, therefore, it is continually being field tested for data accuracy and quality.

Database Updates

We actively update our database to include new well permits, well status changes, and additional information as it becomes available.

- **Monthly updates** – include new permits, well status changes, updated mapping and production volumes
- **Biannual updates** – all data included in the monthly updates in addition to updated production decline curves, 50-year EURs, and associated EUR per 1,000' values
- **Monthly Newsletter** – summary of basin activity and database changes

Database Overview

- Horizontal well data for **Kentucky, Ohio, Pennsylvania, Virginia, and West Virginia**
- Over **13,500 producing horizontal wells**
- Basic well details and completion summaries
- **Interactive mapping** including surface, landing, and bottom hole locations (KMZ and shapefiles)
- **Monthly production volumes**
